Projects

Goat's Guide (V2) | goatsguide.com

If you know about an upcoming concert, fest, or tour, share the flier on Goat's Guide - a DIY bulletin board for poster artwork and event information. This is a new strategy on a passion project utilizing the PERN stack along with TDD and CI techniques. Custom authorizaton and protected endpoints make both the frontend and REST API private to the community. Read more about the project and get demo account access here.

PostgreSQL • Express • React • Node.js • CSS • REST API • SQL • Zeit/Now • Heroku • TDD server-side • Mocha, Chai, and Supertest

Goat's Guide (V1) | goats-guide.herokuapp.com

Goat's Guide is a heavy metal event & venue database concept as well as an ongoing study in UX design. I am currently reworking this project using React, Express, and Node.js to reduce app loading time, and improve user experience while encouraging more complete and user-sourced event data.

Ruby on Rails • HTML-scraping • Watir • Nokogiri • background tasks • Sidekiq • Devise gem auth • PostgreSQL • Heroku
